

Student Responsibilities

Uphold and honor the spirit of Crittenden's Pillars in your actions and words.

- Students are expected to give 100% effort and have a positive attitude about math; do **NOT** be afraid, be **WILLING** to take risks and make mistakes, and step outside of your comfort zone. Challenge yourself to learn a new way. Understand what makes you successful as a student in our classroom and school community.
- Be creative when approaching problems: draw pictures, build models, use manipulatives in order to see problems from different viewpoints.
- Communicate effectively and coherently about math using appropriate vocabulary.
- Attend class and arrive on time. This includes having all required materials out and ready at the beginning of class.
- Abide by the Engagement Norms established in the classroom.
- Contribute to class discussion, ask questions, and seek help when needed.
- Show your parents our class website, review the general class information, and all of the important links.
